

pure skin   
at the Longfrie

The Longfrie Surgery offer treatments using an advanced intense pulse light system aimed at the removal of

unwanted skin blemishes

---

thread veins

---

acne scarring

---

undesirable hair

---

Led by Dr A J Machin, our staff are all fully qualified nurses or doctors who have undergone additional training in the uses of EPL technology. Our equipment conforms to the strictest safety standards and we carry out regular health and safety checks to maintain this.

Most skin and hair types are suitable for our treatments. Pure Skin at the Longfrie offer a team of discreet professional staff who will be happy to advise you before you book an appointment.

**Contact 266773 to make an appointment or for more details**

The phaser EPL uses the unique smartlite delivery system, which means that lower and safer levels of light energy can be used to target the hair follicle or blemish and achieve excellent results whilst minimising any discomfort during the treatment. For this reason our procedures are better tolerated than most other EPL systems.

The Chromogenex Phaser EPL is a state of the art Intense Pulsed light device that offers:

a long lasting alternative to waxing or sugaring unwanted hair from almost any area of the body

---

permanent removal of pigmented skin blemishes and thread veins

---

treatment for acne scarring

---

# The treatments

## **Long lasting hair removal**

It will be necessary to have a course of treatments to ensure long lasting hair removal. The number of treatments depends on hair and skin type, location of the hair and various other factors.

Our therapists will be able to offer you an initial consultation and FREE patch test. This will then give you an idea of the number of treatments necessary (usually 5-8) and ensure that the proposed treatment will be appropriate for you. The cost of the initial consultation will be refunded if you then proceed to book a course of treatments.

## **Skin pigmentation/thread veins**

These lesions will usually respond to one or two treatments. Our staff will be happy to discuss the procedure with you before booking a consultation to proceed with the treatment.

## **Acne scarring**

A course of treatments will usually be necessary to achieve the best results. Depending on the extent and severity our staff will offer an initial consultation and FREE patch test to ensure the treatment is appropriate for your condition. The cost of the initial consultation would be refunded if you proceed to book a course of treatments.

## **What do I need to know?**

It is important to avoid sun and sun bed exposure for 6 weeks before and after each treatment. It is also better to have avoided waxing, plucking or electrolysis for as long as possible before the procedure. We advise the avoidance of bleaching or depilatory creams for 2 weeks before and after the procedure. We will advise using a SPF30 on any exposed areas after treatment.

## **Will I be suitable for treatment?**

You have to be over 18. The treatment is not suitable for all skin types, but this will be assessed at the initial consultation. The cost of the initial appointment will be refunded if you are not suitable for the treatment or you undertake one of the courses of treatment.

## **Will it be painful?**

Some mild tenderness and some redness of the skin may occur but because of our smartlite delivery system these effects are usually minimal and very well tolerated.
